39th Annual Production Sale

"Our Operation Focus is to Provide Superior Beef Genetics"

Dear Friends,

Each year we strive to offer an improved genetic selection for you to improve your cowherd – be it commercial or purebred. We endeavor to balance all economically important traits to produce superior, documented, proven genetics.

We recognize it is your support that has allowed GV Limousin to develop this gene pool. GV utilizes the technology and science available to create the type of cattle that will meet the demands of all segments of the industry. We provide you with all of the data we have in order to help you evaluate all traits to make an informed selection to meet your specific goals.

Please plan to join us on Saturday, February 15th, in Garnett, Kansas for our 39th Annual Production Sale. You can view videos of all sale cattle online on DVAuction.com. If you can't be here on sale day – you can bid online on DVAuction.com or call Anderson County Sale Barn at (785) 448-3811.

We feel we have an outstanding set of Limousin and Lim-Flex cattle to offer you this year.

Sincerely,

The GV Limousin Family

"We put as much emphasis on customer satisfaction as genetic design"

All Birth Weights are actual, all Weaning Weights and Yearling Weights are adjusted to 205 and 365 days of age, respectively. All EPDs are accurate as of January 4, 2020. All Spring Yearling Bulls will have GE-EPDs available on sale day.

DOCILITY

Limousin is #1 in the docility trait across all breeds.

LIMOUSIN LIM-FLEX 

Limousin Today - Profit Tomorrow

Limousin x Angus Hybrid

Value Added Cattle Begins with Genetics

The selection for improvement of carcass quality is possible by understanding the selection tools. The NALF EPDs for Limousin and Lim-Flex® provide the following:

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (FT): Differences for fat thickness, in inches, for a carcass over the 12th rib. Smaller numbers

of fat thickness are preferable as excess fat can be detrimental to yield grade.

Mainstream Terminal Index (\$MTI): Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

Limousin and Lim-Flex \$MTI is a mainstream terminal index. This is the expected average profit per carcass of progeny of Limousin bulls mated to British-cross cows, with all calves placed in the feedlot and sold on a mainstream grid. It is a terminal sire index, including growth and carcass information only, since all calves are marketed and no females remain in the herd. The use of \$MTI is an excellent tool for selecting cattle with feedlot merit but should be used in moderation if replacement females are being retained for breeding purposes since it is a terminal index.

Carcass traits for Limousin and Lim-Flex are being enhanced to add to the accuracy of EPDs by seedstock suppliers. Look for the NALF GE-EPD logo for animals that have been tested with the genomic profiler for these traits as well as others for added assurance in making selections.

How much is a bull really worth?

Here is a simple, real-world formula that can be used to calculate how much you can pay for a better bull.

Increase in pounds per calf
 X (the number of calves sired by him per year)
 X (the number of years you keep the bull)
 X (the expected selling price of calves)
 = Addition dollars you can pay for a better bull

For example, a bull that can add 20 pounds to his calves, sires 20 calves per year for 4 years, and his calves sell for \$2.25 per pound.

$$20 \times 20 = 400 \times 4 = 1,600 \times \$2.25 = \$3,600$$

So that bull is worth \$3,600 more than a bull that will keep your weaning weights the same. Take this formula and plug in your own numbers to figure out what you can afford to pay. Remember, this formula doesn't account for improvements in calving ease, replacement quality, yearling weights, feedlot gain and carcass value.

General Information

TERMS: Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately following the auction and before loading.

BREEDING GUARANTEE: All bulls, at the time of the sale, are guaranteed breeders. A bull is determined a breeder when he settles one or more females and/or passes a satisfactory semen test. **These bulls were all semen tested in December 2019.** Bulls believed to be non-breeders are returned to the seller at the buyer's expense. If they are proved to be non-breeders, transportation expenses of the replacement, if made, will be paid for by the seller. This guarantee is a contract between the buyer and the seller. All other parties are acting as agents or representatives only.

HEALTH: Health certificates will be available with each lot sold.

LIABILITY: Each animal will be at the buyer's risk as soon as sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the animal sold. Neither owner nor sale representatives can be held responsible for any accidents, but every effort will be made to provide for the safety and comfort of those attending this sale.

INSURANCE: Anyone wishing to insure their purchase will be responsible for doing so.

ANNOUNCEMENTS: Announcements made sale day will take precedence over printed material in the catalog. All EPDs are accurate as of 1/4/20.

Thank You for joining us for the sale!
