40th Annual Production Sale

Dear Friends,

Each year we strive to offer an improved genetic selection for you to improve your cowherd – be it commercial or purebred. We endeavor to balance all economically important traits to produce superior, documented, proven genetics.

We recognize it is your support that has allowed GV Limousin to develop this gene pool. GV utilizes the technology and science available to create the type of cattle that will meet the demands of all segments of the industry. We provide you with all of the data we have in order to help you evaluate all traits to make an informed selection to meet your specific goals.

Please plan to join us on Saturday, February 20th, in Garnett, Kansas for our 40th Annual Production Sale. You can view videos of all sale cattle online on DVAuction.com. If you can't be here on sale day – you can bid online with DVAuction.com, or call Anderson County Sale Barn at (785) 448-3811.

Once again, we feel we are offering you one of the stoutest, high-performing sets of Limousin and Lim-Flex cattle you will find anywhere in the country.

God Bless America!

The GV Limousin Family

Limousin cattle have had a long and documented history of providing genetics to the commercial cattle industry that have superior feed efficiency which remains critical to profitability. Genetics offered by GV Limousin in their annual production sale reflect this economically important trait. The GV herd is heavily influenced by sires that have a proven track history of superior Residual Feed Intake (RFI).

The 2020 GrowSafe® Systems Top 150 Proven Bulls list for RFI included 3 sires in the top 10 of 150 sires across all breeds, WULFS XCELLSIOR X252X, RUNL STETSON 850S and WULFS XTRACTOR X233X, all bulls that ranked in the top 10 with WULFS EXCELLSIOR listed as number one! Purchasers of bulls offered by GV Limousin can feel very confident that they are adding superior performance directly related to increased feed efficiency to their commercial operations that benefit both cowherd and feedyard operations across the United States.

"Our success isn't just about hard work. It comes down to our focus on genetics, our passion for good cattle and the way we treat our customers." - Gene Raymond

All Birth Weights are actual, all Weaning Weights and Yearling Weights are adjusted to 205 and 365 days of age, respectively. All EPDs are accurate as of January 5, 2021.

DOOCILITY

Limousin is #1 in the docility trait across all breeds.

6205 S Main Street
Suite D-280
Aurora, CO 80016

To learn more about
Limousin or Lim-Flex cattle,
please contact the NALF
office.

LIMOUSIN LIM-FLEX 
Limousin Today - Profit Tomorrow Limousin x Angus Hybrid

Value Added Cattle Begins with Genetics

The selection for improvement of carcass quality is possible by understanding the selection tools. The NALF EPDs for Limousin and Lim-Flex® provide the following:

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (FT): Differences for fat thickness, in inches, for a carcass over the 12th rib. Smaller numbers

of fat thickness are preferable as excess fat can be detrimental to yield grade.

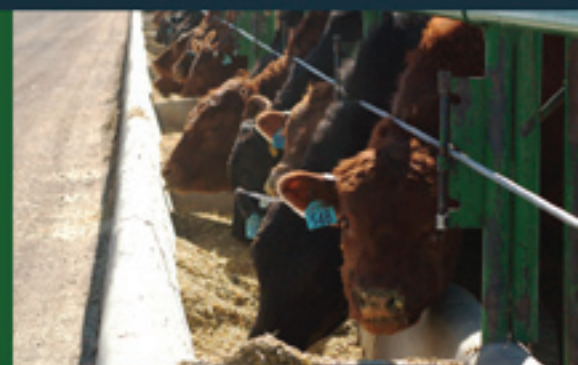

Mainstream Terminal Index (\$MTI): Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

Limousin and Lim-Flex \$MTI is a mainstream terminal index. This is the expected average profit per carcass of progeny of Limousin bulls mated to British-cross cows, with all calves placed in the feedlot and sold on a mainstream grid. It is a terminal sire index, including growth and carcass information only, since all calves are marketed and no females remain in the herd. The use of \$MTI is an excellent tool for selecting cattle with feedlot merit but should be used in moderation if replacement females are being retained for breeding purposes since it is a terminal index.

Carcass traits for Limousin and Lim-Flex are being enhanced to add to the accuracy of EPDs by seedstock suppliers. Look for the NALF GE-EPD logo for animals that have been tested with the genomic profiler for these traits as well as others for added assurance in making selections.

NALF-Tyson Fresh Meats LIMOUSIN GRID

Marketing opportunity for Limousin cross fed cattle.
For more information on the Limousin Grid, contact the NALF office at 303-220-1693 or visit NALF.org.

GV Sale Bulls vs Limousin & Lim-Flex® Breed Average EPDs for Non-Parent Animals (International Cattle Evaluation Run date: 01/21/2021)

	CED (%)	BW (lbs)	WW (lbs)	YW (lbs)	MK (lbs)	CEM (%)	SC (cm)	DOC (%)	YG (units)	CW (lbs)	REA (inches)	MB (units)	\$MTI (units)
GV Purebreds	11	0.67	73	110	23	7	0.85	13	-0.53	26	1.24	-0.05	54.91
Limousin Calves Average	12	1.10	64	93	22	7	0.60	12	-0.53	20	1.16	-0.06	51.63
GV Lim-Flex®	15	0.30	74	117	24	9	0.96	12	-0.27	40	1.05	0.14	60.03
Lim-Flex® Calves Average	12	0.80	70	108	21	7	1.00	13	-0.21	33	0.76	0.22	60.93

How much is a bull really worth?

Here is a simple, real-world formula that can be used to calculate how much you can pay for a better bull.

Increase in pounds per calf
 X (the number of calves sired by him per year)
 X (the number of years you keep the bull)
 X (the expected selling price of calves)
 = Addition dollars you can pay for a better bull

For example, a bull that can add 20 pounds to his calves, sires 20 calves per year for 4 years, and his calves sell for \$2.25 per pound.

$$20 \times 20 = 400 \times 4 = 1,600 \times \$2.25 = \$3,600$$

So that bull is worth \$3,600 more than a bull that will keep your weaning weights the same. Take this formula and plug in your own numbers to figure out what you can afford to pay. Remember, this formula doesn't account for improvements in calving ease, replacement quality, yearling weights, feedlot gain and carcass value.

General Information

TERMS: Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately following the auction and before loading.

BREEDING GUARANTEE: All bulls, at the time of the sale, are guaranteed breeders. A bull is determined a breeder when he settles one or more females and/or passes a satisfactory semen test. **These bulls were all semen tested in December 2020.** Bulls believed to be non-breeders are returned to the seller at the buyer's expense. If they are proved to be non-breeders, transportation expenses of the replacement, if made, will be paid for by the seller. This guarantee is a contract between the buyer and the seller. All other parties are acting as agents or representatives only.

HEALTH: Health certificates will be available with each lot sold.

LIABILITY: Each animal will be at the buyer's risk as soon as sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the animal sold. Neither owner nor sale representatives can be held responsible for any accidents, but every effort will be made to provide for the safety and comfort of those attending this sale.

INSURANCE: Anyone wishing to insure their purchase will be responsible for doing so.

ANNOUNCEMENTS: Announcements made sale day will take precedence over printed material in the catalog. All EPDs are accurate as of 1/5/21.
