

# GV LIMOUSIN

## Limousin & Lim-Flex for Limousin Breeders & Commercial Producers

We take seriously the responsibility of raising Limousin and Lim-Flex genetics to meet the demands of progressive purebred breeders and the commercial industry. We use all available tools (performance data, EPDs, DNA and ultrasound) in our mating decisions to produce superior genetics.

As a result, our cattle stack up both numerically and phenotypically while working great in both mainstream and specialty markets. We invite you to inquire more about the philosophy we've been honing for more than 40 years.

### Spring Production Sale February 15, 2014 Complete Performance Data & Industry Leading Genetics
